Attached you will find the bill for the cost of the installation of the new UPS from July 13-14, 2021 from Pendleton Electric.

The project cost from there is much higher than anticipated due to multiple factors.

The first thing was there was an undiagnosed electrical issue in the sockets for UPS & Generator power on 5 different outlets. This was discovered only by accident when a "dead" panel started arching and was live with power upon dismantlement of the panel box.

This was traced down and needed to be fixed, prior to any more work being done on the installation project. The electrician identified these sockets. 2 or 3 were fixed that night and the other 2 will be scheduled in the near future for repair.

The bill is showing overtime and double overtime, due to the time it took to get the unit installed.

Some of the time submitted is for on-call time for an electrician on site, while the other company, CPSI-UPS retailer, was doing their installation. The technicians had some problems with a part that is not working-to be replaced soon. Furthermore they had additional problems getting the unit hooked up to power in the electrical room due to no instructions or schematics for the unit being included. This resulted in a cost for the electrician to be on standby.

I have reached out to CPSI explaining that the 5 hours it took, while this was being problem solved, is excessive. I will continue to work on this and also will be advising Oregon Emergency Management, who will be reimbursing the county for part of the cost of the UPS. I do not believe that we should be responsible for this entire time frame for the electrician being on site.

I would like to get Pendleton Electric paid asap as they did a spectacular job and kept us informed as things progressed. Their personnel were spot on with being responsive to the needs of the Sheriff's office and all realized that this was extremely important to get done as soon as possible.

Please let me know what I need to do from here for payment to them.
